Inventory of Major Alberta Projects

Introduction

The Inventory of Major Alberta Projects is produced by Alberta Employment, Immigration and Industry to assist firms in identifying potential supply opportunities.

Effective January 1, 2007 the Inventory lists major projects in Alberta valued at \$5.0 million or greater (up from the \$2.0 million minimum in previous editions) that are planned, underway, or have recently been completed.

Project data is obtained from public and private information sources. Where possible, this data has been verified with the project proponent/developer. However, users of the Inventory may wish to *confirm* project data with the proponent/developer.

While efforts have been made to obtain the most recent information, it should be noted that projects are constantly being re-evaluated by industry. Although the Inventory attempts to be as comprehensive as possible, some information may not be available at the time of printing, or not published due to reasons of confidentiality.

The Inventory can be accessed on the Internet at www.alberta-canada.com/statpub/albertaConstructionProjects/mpindex.cfm. New projects and (where possible) updated information on current projects is added to the Internet database on a monthly basis. The print edition of the report is produced quarterly. **Projects added to the Inventory between April 1 and June 30, 2008 are noted in upper case in the Project Description column.** If you have questions or require additional information about the Inventory, contact the Policy and Economic Analysis Division by phone at (780) 427-6787, or by fax at (780) 422-0061.

1. This Inventory lists projects in Alberta, valued at \$5 million or greater, that have recently been completed, are currently under construction, or are proposed to start construction within two years. Not all projects over this threshold are listed due to reasons of confidentiality and/or due to information not being available at the time of printing.
2. Project data is obtained from public information sources. Although, where possible, this data has been verified with the project proponent/developer, users of the Inventory may wish to *confirm* project data with the proponent/developer.
3. The Inventory does not breakdown project expenditures by any given year. The cost of a project is the value of expenditures expected over *all* phases of project construction, which may span over two or more years.
4. The cost of projects listed in the Inventory are *estimated* values only.
